

# Partner coding practice 2

Your names

**Step 1: Load packages**

**Step 2: Focusing on particular groups**

Answer:

**Step 3: Visualizing body mass**

**Step 4: Adding more detail**

**Step 5: Numerical quantities**

**Step 6: Interpreting your EDA**

Working together as a team, use the summary table and plot you both created to address the following questions:

1. Which island has the biggest penguins? Does this depend on sex?

Answer:

2. Do you think it is the best idea to report a single summary statistic for body mass? If not, what would you like to do to have a more informative summary table/data frame?

Answer:
